ISUOG Newsletter

September 2020

I hope you are all keeping well during these unprecedented times.

As the leading international Society in our speciality, we have worked hard to develop new online courses to support your education and development. By re-imagining our [World Congress](#), ISUOG is the only global Ob/Gyn Society organizing a 'Virtual' meeting in 2020 that is not only vastly superior, but also more accessible than ever before, with discounted [registration rates](#) for Members, trainees, sonographers and low- and middle-income countries. Our sophisticated [digital platform](#) offers a unique user experience that includes subtitles of live content only in English, [Spanish](#), French and [Chinese](#) in 3 of the 5 parallel streams, opportunities for interaction and networking and on demand viewing after the event. I look forward to seeing you next month!

The Education team have also re-imagined our offerings and developed new online courses you don't want to miss. Have a look at our latest [Cardiac Advanced online series](#) with three courses starting this Saturday. Register now and watch live, or view on demand at your own pace! More online courses are being developed and will be available at a reduced cost for Members and those residing in lower resource countries.

ISUOG also offers opportunities for involvement in our society. We now have a number of vacancies on Committees and Task Forces that are available only to ISUOG Members. So why not join colleagues from around the world and donate your time and expertise, making new friends in the process? Please check out the [vacancies here](#) and [become a Member](#) if you are interested in these positions.

Many new initiatives are being developed and we are looking forward to making them available for our community.

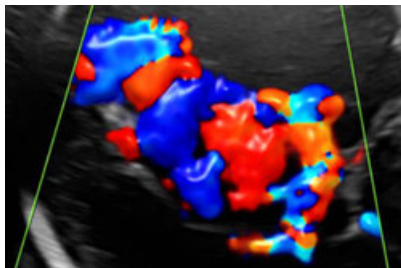

Also on behalf of our President, Prof. Bilardo, and the entire Board of Trustees, I extend my very best wishes to you all. Stay well and keep safe and I hope to see you soon.

Yours sincerely,

Johan Vos
Chief Executive Officer, ISUOG

UOG in September

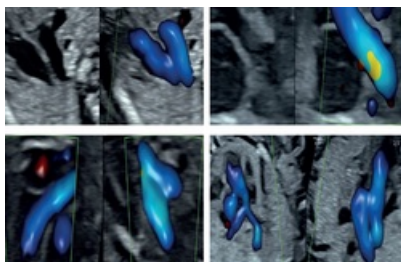

This issue of Ultrasound in Obstetrics & Gynecology includes a series of papers on the fetal brain, including a study on the role of [prenatal MRI in fetuses](#) with isolated mild or moderate ventriculomegaly and updated [ISUOG Practice Guidelines](#) on the sonographic examination of the fetal central nervous system (Part 1), as well as a study and accompanying video abstract on the [treatment and outcome of 370 cases with spontaneous or post-laser twin anemia–polycythemia sequence](#) managed in 17 fetal therapy centers, a study on the use of [PAPP-A, PIGF or both for first-trimester pre-eclampsia screening](#), and a study on [transrectal high-intensity focused ultrasound for management of rectosigmoid](#) deep infiltrating endometriosis.

Your support of the White Journal is crucial to its success so [become an ISUOG journal member](#) and access all of the content today!

UOG Highlights

ISUOG's first course in the "Cardiac Advanced online series", 12 September

Join Prof. Carvalho, Dr Simon Meagher and Prof. Dario Paladini for the [three-course Cardiac series](#) covering malformations of the fetal semilunar valves, override anomalies and transposition of the great arteries. You can register for all three courses at once and will have access to the recordings for 1 month after the course. Start preparing for the course by visiting our website to watch a variety of videos on the fetal heart and find more resources including UOG articles on our [supplement your learning page](#). You can also test your knowledge by answering a questionnaire [here](#).

[Become an ISUOG member](#) today to benefit from discounted fees for this course!
