# Welcome Speech

Assalamu'alaikum Warahmatullahi Wabarakatuh,  
Salam sejahtera bagi kita semua, Syalom, Oom Swastiastu, Namu Buddhaya,  
Wei De Dong Tian, Salam kebajikan.

*It all starts from implantation until live birth*

Menghasilkan generasi bangsa terbaik adalah tantangan masa kini dan mendatang dalam ilmu obstetri ginekologi. Masalah yang muncul dimulai dengan banyaknya kasus infertilitas dengan berbagai varian penyebab hingga masalah-masalah dalam kehamilan, baik pada maternal maupun fetal sehingga skrining dan diagnosis dini menjadi hal yang harus dikuasai oleh para dokter spesialis obstetri ginekologi.

Jumlah pasangan subur di Indonesia saat ini mencapai kurang lebih 42 juta pasangan dan jumlah pasangan dengan kasus infertilitas mencapai kurang lebih 4,2 juta pasangan (angka kejadian 10% dari jumlah total pasangan subur). Begitupun dengan meningkatnya kasus-kasus kelainan kromosom janin, TTTS janin kembar, dan komplikasi pada maternal terutama preeklamsia yang menjadi salah satu penyebab mortalitas dan morbiditas maternal dan perinatal yang tinggi. Pendekatan yang tepat dan tambahan pengetahuan untuk para dokter spesialis obstetri ginekologi tentu akan sangat diperlukan untuk mempertajam diagnostik sampai tatalaksana yang tepat dan terpadu dalam praktek sehari-hari.

Penyakit jantung bawaan (PJB) merupakan penyebab kematian tersering dari seluruh kelainan bawaan. Angka kejadian PJB terjadi sekitar 8 dari 1000 kelahiran hidup. Kelainan jantung janin yang tidak terdeteksi selama kehamilan akan menyebabkan penanganan yang tidak adekuat pada bayi akan menyebabkan tingginya angka kematian bayi baru lahir. RSAB Harapan Kita yang telah ditetapkan sebagai Pusat Rujukan Ibu dan Anak Nasional bekerja sama dengan *International Society of Ultrasound in Obstetrics and Gynecology (ISUOG)* berinisiatif mengadakan seminar dan pelatihan dalam menjawab tantangan ini, dan ke depannya kesempatan ini akan membuka peluang kerjasama dengan para sejawat dan berbagai rumah sakit di wilayah Jakarta maupun di luar Jakarta untuk menjadi tempat rujukan dan magang dalam memperdalam diagnosis dan tatalaksana kasus-kasus tersebut.

Sampai jumpa di INAFARM 2024.

Wassalamualaikum Warahmatullahi Wabarakatuh.
