

February 2021

Dear Colleagues,

These monthly newsletters seem to come round rather rapidly; I have decided that I have no future as a newspaper columnist having to write something relevant and interesting on a weekly basis! I contemplated writing a list of my recommendations to watch on Netflix during lockdown, but was reminded this would not be appropriate for a newsletter to the membership of ISUOG.

So, what's new? I think the first thing to tell you is that the ISUOG Board has taken a decision that the World Congress will be held in London this year. As I indicated in my previous newsletter, the event is planned to be hybrid, so a mix of "in person" and virtual. The main reason for this decision is the practical difficulty in visiting conference locations in continental Europe during the current restrictions on travel. On the other hand, the ISUOG staff based in London will obviously be able to carry out the necessary site visits more easily when they are local. As we all know, things will inevitably remain fluid in a world of new variants, possible vaccine resistance and potential travel restrictions...

ISUOG President  
Prof. Tom Bourne

#### Launching ISUOG's free monthly webinar series.

We are delighted to launch our free monthly webinar series on 28th February (Sunday) with the webinar on ['COVID-19 - One year on'](#). The webinar will establish how our therapeutic knowledge of treating COVID-19 has developed in the past year, provide information about vaccination in pregnancy and wider issues relating to global vaccination policy, and shed more light on the lessons of the large population based studies on COVID in pregnancy. Find out more about the [faculty](#) and the [program](#) on our website. [Register your interest](#) to attend today and we will let you know as soon as registration opens.

#### UOG journal

View the highlights

The February issue of Ultrasound in Obstetrics & Gynecology includes [State-of-the-Art Reviews on pharmacologic considerations for COVID-19 in pregnancy](#) and the [technique and diagnostic potential of first-trimester fetal neurosonography](#), an [individual participant data meta-analysis of Foley catheter vs. oral misoprostol for induction of labor](#), a [proensity score matched analysis of the risk of COVID-19-related outcomes in pregnant vs non-pregnant women](#), a study on the [prediction of pre-eclampsia in twin pregnancy by maternal factors and biomarkers at 11-13 weeks' gestation using data from the EVENTS trial](#), and a study on [vessel morphology depicted by 3D power Doppler ultrasound as a second-stage test in adnexal tumors that are difficult to classify](#).

To view all UOG content, [become an ISUOG journal member](#) today.

#### Patient Information

Read and download the new 5 leaflets

ISUOG [Patient Information series](#) has 5 new leaflets added on various obstetrical conditions. These include: [Hydrocolpos/hydrometrocolpos](#), [Duodenal obstruction](#), [Gastrochisis](#), [Splenic Cyst](#) and [Meckel Diverticulum](#).

Patient Information leaflets aims to demystify and make the conditions more understandable to women and their families, and are currently available in [English](#) and [Simplified Chinese](#).

Download the latest leaflets

#### Basic Training

ISUOG Basic Training is starting the year with a ['Run a BT course'](#) organised by the Nagpur Obstetric and Gynaecological Society in India; following the course, all delegates will be assessed to obtain a [Certificate of Completion of Basic Training](#). Find out how you can bring [ISUOG's Basic Training program](#) to your own training centre now. To fulfil our goal of reaching as many trainees as possible, ISUOG will be hosting a one-day virtual Basic Training course in the spring, followed by the second edition of the highly successful Basic Training Flex this Summer by a repeat of last year's hugely successful BT Flex program. Check out our [website for the latest on Basic Training](#).

Find out more

[VISUOG](#) is our online visual encyclopedia containing multitude of information, including ICD code, pathology, etiology, associated anomalies etc. about [obstetrical and gynecological conditions](#). VISUOG provides you with up-to-date information, including images, and detailed explanation. With [115 chapters](#) available to read, make sure to use VISUOG as your reference and a guide anytime you want. VISUOG is available for free for all ISUOG members. [Become a member](#) to explore.

ISUOG membership puts thousands of [educational resources](#) at your disposal, including lectures and resources delivered by the leading names in the field of obstetrical and gynecological ultrasound. With unlimited access to [lectures](#), [CME activities](#), [Virtual encyclopedia](#), discounted rates for [ISUOG education events](#) and [so much more](#), our goal is to support you in your journey in the field of obgyn ultrasound, and contribute to improving women's health outcomes around the world.

[Become a member](#) and join the ISUOG community today.

Help us send you information specific to your interests! [Log in](#) and go to 'My ISUOG' to update details such as your speciality, so we can send you the most specific content. Please also make sure your other details are up to date. Please review our [Privacy Policy](#).
