

Day 1: Early Pregnancy - Chaired by Professor Tom Bourne

Session 1: Early pregnancy complications: mechanisms, treatments and outcomes

- Are we getting close to better understanding the underlying mechanisms that cause miscarriage: stem cells and NK cells?

Professor Jan Brosens (University of Warwick)

- Are there new treatment options for ectopic pregnancy on the horizon?

Professor Andrew Horne (University of Edinburgh)

- Do early pregnancy events influence short and long-term pregnancy outcomes?

Dr Maya Al Memar (Imperial College London)

Top 4 abstracts

Session 2: Prediction and diagnosis in early pregnancy

- How early in pregnancy can we usefully define structural abnormalities in the embryo? (Do new ultrasound technologies help?)

Dr Harsha Shah (Imperial College London)

- How to rationalize the management of pregnancy of unknown location: serum progesterone, the hCG ratio and novel prediction models)

Dr Shabnam Bobdiwala (Imperial College London)

- Management options for tubal ectopic pregnancy and case examples

Ms Emma Kirk (Royal Free Hospital, London)

Top 4 abstracts

Session 3: Imaging, trials and impact on patients

- How to assess and manage enhanced myometrial vascularity

Professor Dirk Timmerman (KU Leuven, Belgium)

- Caesarean scar pregnancy – diagnosis, management strategies and how to advise patients who chose to continue with the pregnancy

Mr Davor Jurkovic (University College Hospital London)

- What have we learnt from randomised trials in early pregnancy?

Professor Arri Coomarasamy (University of Birmingham)

Top 4 abstracts

Session 4: Early pregnancy events: psychological consequences

- The psychological impact and management strategies for vomiting in pregnancy

Miss Cecilia Bottomley (University College Hospital London)

- The psychological impact of early pregnancy events

Dr Jessica Farren (Imperial College London)

- Avoiding diagnostic error in early pregnancy

Professor Tom Bourne (Imperial College London)

Top 4 abstracts

Day 2: Prematurity - Chaired by Professor Philip Bennett

Session 1: Preterm birth: strategies and new mechanisms

- The microbiome and its relationship to preterm birth
Dr David MacIntyre (Imperial College London)
- Population screening by cervical length, progesterone and other interventions
Professor Bo Jacobsen (University of Gothenberg)

Top 4 abstracts

Session 2: Prematurity prediction and prevention

- Cervical length, fibronectin and other biomarkers
Professor Andrew Shennan (King's College, London)
- Cervical elastography and the prediction of prematurity
Dr Richard Brown (Northwick Park Hospital, London)
- The role of cervical cerclage to prevent prematurity
Dr Lindsay Kindinger (University College London)

Top 4 abstracts

Session 3: The controversies put in context

- Fetal growth restriction and spontaneous preterm labour
Professor Gordon Smith (University of Cambridge)
- Progesterone to prevent preterm labour
Professor Phil Bennett (Imperial College London)

Top 4 abstracts

Session 4: Pharmacotherapy and preterm delivery

- Using antenatal steroids
Dr Sarah Stock (University of Edinburgh)
- Evidence for the value of tocolytic drugs
Professor Jim Thornton (University of Leicester)
- Use and mechanisms of action of Magnesium Sulphate
Professor Henrik Hagberg (University of Gothenburg)

Top 4 abstracts

Day 3: Fetal Medicine - Chaired by Professor Christoph Lees

Session 1: Fetal compromise

- Late fetal compromise & growth restriction: TRUFFLE 2
Professor Christoph Lees (Imperial College London)
- Fetal hypoxia: defence mechanisms
Professor Dino Giussani (University of Cambridge)

Round Table: Intergrowth, WHO and customization
Professor Aris Papageorgiou (St George's London)
Professor Kurt Hecher (UKE, Hamburg)

Session 2: Abnormally invasive placenta

- Imaging the placenta
Professor Giuseppe Cali (Sicily)
- US, MRI, Fusion
Dr Sally Collins (University of Oxford)

Top 4 abstracts

Session 3: Invasive and non-invasive therapy

- Non-invasive therapy: the potential of HIFU
Dr Caroline Shaw (Imperial College London)
- Patient selection in fetal surgery: CDH and Spina Bifida
Professor Jan Deprest (KU Leuven Belgium)

Top 4 abstracts

Session 4: Multiple pregnancy

- Higher order multiples: diagnosis and outcomes
Professor Mark Kilby (University of Birmingham)
- Selective reduction: comparison of techniques
Dr Amar Bhide (St George's London)

Round Table

Day 4: Fetal Medicine - Chaired by Professor Christoph Lees

Session 1: Facial Dysmorphology

- Imaging Cleft, craniosynostoses, and micrognathia
Dr Andrea dall'Asta (University of Parma)
- Cleft surgery for fetal medicine specialists
Mr Per Hall (Addenbrooke's Hospital, Cambridge)

Top 4 abstracts

Session 2: Cardiac conundra made simple

- Cardiac Arrhythmias explained
Dr Victoria Jowett (Imperial College London)
- Outflow tracts & aortic arch variants
Dr Julene Carvalho (Royal Brompton, London)

Top 4 abstracts
